TORONTO (AP) — World leaders went out of their way to stress international cooperation Saturday on the eve of the restoration economic summit, but a fight over agricultural subsidies threatened to disrupt the hopeful equality. The 14th annual meeting between the world's largest industrial countries — the United States, West Germany, Britain, France, Italy and Canada — was being held under the tightest security ever seen in Canada's largest city.

WRIGHT ORGANIZED a North End anti-drug rally and parade May 20 in response to the drug problem.

"It was right for us to take our message to the streets," he said, "but we're trying to do something to better our community and our young people."
