These have been identified as top issues to help progress all communities. All of these projects help redefine our community and allow us to project to the world that the city of Champaign is a vibrant community and that quality of life is attainable for all citizens:

A) Redistricting map process - For the most part, the mapping process is the mapping process. You have to really look at the maps to decide which one you are in favor of. The only map that we should all oppose is Map 1. Map 1 divides the districts in a way where diversity on the City Council is less likely.

B) UC2B is the future of the city. It is the future to job growth and economic development in all communities. Currently, we have to make sure that federal dollars are used to ensure that minorities are getting access to this technology.

C) Summer Youth Employment Program is huge for our entire community. The US Chamber of Commerce has clearly said that our youth are not prepared for today and tomorrow's workforce. Champaign has an opportunity to be one of the leaders in preparing youth for the workforce.

D) Police Citizens Review Board is a critical piece to improving the relationships between community and police. Within it is an open process where both citizens and police have an opportunity to come to one commonplace to review complaints (comparing practices to policy), and determine best practices based on real world experiences.

E) First Street Continuous Development has to be developed and we must continue to diversify our inventory of minority owned businesses.
