Good evening,

It's always a pleasure to serve you. Below is the link to tonight's Regular Study Session:

<http://willkyles.com/featured/check-out-the-new-website/>

As the summer ends, we have even more exciting times - kids going back to school, University of Illinois football, etc. I will be posting in the near future about any back to school programs, giveaways, shots for the students, etc. I regularly update my website at www.willkyles.com, where you can find information provided from different constituents and organizations around our county. I believe that information is power and that there is a lot of great info out there. My goal is to continue to compile it one place so that it is easier for you to access.

Summer has presented its successes and its challenges. I know that as a community, if we work together, we can be successful. This year we concluded our 2nd Summer Youth Program, which was an opportunity for youth to learn a skill, earn a few dollars, and build a foundation for the future. The "Walk as One" is a huge initiative that the Community Coalition has taken to the next level. I believe that continuing to create opportunities for our residents to communicate concerns builds our identity and builds on our future. Unit 4 completed a Climate Study and analyzed Suspension Data (results on my site). While some of the numbers are alarming, I appreciate the solutions that the study offers. Lastly, there have been some huge strides made in leveling the playing field and improving opportunities for minority contractors.

In the end, we are all working towards a better city, county, state, country, WORLD! Let's continue to play our role to make things better! If I can be of service, please let me know.

Will Kyles

Council Member District 1
